

# A Day for Infection Preventionists

**October 29, 2021**

**Carpenters and Millwright Training Center  
1245 Durrett Lane - Louisville, KY 40213**

*Conference meeting space sponsor:*

This educational activity is jointly provided by Quality Kentucky, Kentucky Hospital Association and the Kentucky Hospital Research and Education Foundation.

**A Day for Infection Preventionists** is aimed at supporting Kentucky infection prevention professionals in their daily work to reduce health care associated infections and provide quality patient care. This one-day conference builds on foundational skills provided in previous educational offerings, as well as explores topics of emerging importance. The target audience includes infection preventionists, chief nursing officers, risk managers, quality improvement leaders, and patient safety personnel in the hospital.

***Due to the ongoing pandemic, space is limited. Please register early to secure your spot!***

## **COURSE OBJECTIVES:**

At the end of the conference, the participants will be able to:

- State the goals and objectives of a strong diagnostic stewardship program
- Describe examples of test ordering dilemmas that affect infectious disease diagnosis
- Explain how the mathematics of laboratory testing affects interpretation and utility of results
- Apply changes and updates to NHSN reporting in regular practice
- Demonstrate how to make changes to reporting plan and other tasks within NHSN
- Determine how to prevent and correct common mistakes with NHSN reporting
- Describe examples of both positive and negative relationships between the Infection Prevention Department and Emergency Department staff
- Use ideas and examples provided by the IP/ED panel to improve the relationship between Infection Preventionists and Emergency Department staff in your facility
- Distinguish between infection prevention in the Emergency Department and hospital inpatient units
- Describe the infection control risk of biofilm formation on surgical instruments and flexible endoscopes
- Clarify point of use care of surgical instruments and flexible endoscopes
- Identify changes from the 2021 Multisociety Guideline on reprocessing flexible GI endoscopes and accessories that affect point of use care
- Evaluate the factors that lead to burnout
- Identify activities and perspectives that reduce the incidence of burnout
- Synthesize interventions that will discourage burnout in your organization
