

Make Yourself Understood Anywhere in the World

Kentucky Hospital Association Medical Visual Language Translator

This invaluable visual language tool enables instant communication with Spanish-only speakers, or the hearing impaired or those who speak in other languages, in situations where language barriers could seriously hinder effective emergency care and medical treatment in urgent situations.

Twenty-eight page foldout of English/Spanish language panels are paired side-by-side with carefully developed picture panels. It enables medical personnel to communicate critical-care questions and get quick answers by having patients point to adjoining pictures or translated phrases. The tool was reviewed by Spanish-speaking and hospital focus groups to maximize its effectiveness in a clinical setting.

The compact, hinge-laminated format makes it easy to handle, wipe clean, and fits most pockets for quick access. This is an essential tool for any doctor, nurse, patient care attendant, technician or medical providers who work with limited English speaking, and non-speaking patient populations.
