

Local Imaging Expertise. Full-Lifecycle Support. One Trusted Partner.

OUR SERVICES

Imaging Equipment Sales

New & Refurbished | Multi-OEM | Locally Supported

- New imaging equipment from leading OEMs across all major modalities
- Refurbished systems vetted, installed, and supported by Radon engineers
- Local sales professionals with deep clinical and operational expertise
- Technology assessments to guide replacement, upgrade, and capital planning decisions

Imaging Equipment Service

Full-Service Coverage Across All Major Modalities

- Multi-vendor service for CT, MRI, PET/CT, Nuclear Medicine, Radiology, Fluoroscopy, C-arms, and more
- Dedicated local Field Service Engineers backed by regional technical experts
- Preventive maintenance, break/fix repairs, and compliance support
- Simplified service delivery through a single, trusted provider

Clinical Engineering & Asset Management

Strategic Clinical Asset Management & Biomed Support

- Biomedical and Clinical Asset Management (CAM) programs
- Risk-based equipment assessments aligned to safety, uptime, and cost control
- Regulatory documentation, reporting, and accreditation support

Imaging Support Services

End-to-End Imaging Infrastructure Support

- Equipment removals, relocations, rigging, reinstallations, and room upgrades
- Loaner systems, hero kits, and subsystem swap-outs to minimize downtime
- Traditional biomedical repairs and supplemental equipment sales
- One partner coordinating service, equipment, and infrastructure needs

WHO WE ARE

Radon partners with healthcare providers and imaging centers across the state of Kentucky. We work side-by-side with hospital leadership, imaging, and biomed teams to reduce downtime, extend equipment life, and align capital planning with clinical priorities.

Our model integrates local field service engineers, clinical asset management and biomedical capabilities, and regional sales teams, providing hospitals with a single accountable partner across all imaging needs.

WHY HOSPITALS CHOOSE RADON

- Leading provider of equipment in the region
- Local Service Teams – Engineers who know your equipment and facilities
- True Multi-Vendor Support – OEM, third-party, and in-house expertise under one partner
- Extended Equipment Life – Proven support beyond OEM end-of-life timelines
- Aligned Clinical & Financial Outcomes – Sales, service, and biomed working together
- One Partner Across the Imaging Lifecycle
